HOW BOT WILL WORK

- bot will ask user to share social handle (if any), there most viral content (if any)
- bot will have menu (similar to [github repository](#) or better ; here a guide to content creation (for new creators , how to select niche in your interest , how to select unique idea and how to create on it , etc.)
- bot's options, how to be content creator in 2025 (guide ; entire fucking book must be here or something good; this can be a placeholder guide/message) ; start 21 days createathon challenge ; etc.

[add more relevant stuff in future in bot , which can be useful]

- 'start challenge' must be like last step
- if bot has received no handle and most viral content ; will prompt user to start 21 day createathon challenge: everyday will send user message asking to post content. ask them to enter the content link , views count
- if bot has received handle and viral content (+ view count) ; we will have a system to direct them to creatorship , after there 21 day challenge , check there reach growth , if they are really good then direct them to creatorship for brand deals

bot 's architecture or workflow's reference below , this is for reference , you can create a better version
